DELIVERING STRENGTH AND FLEXIBILITY

HPE and SUSE simplify enterprise with speed and scale to evolve your hybrid infrastructure

Whether your applications reside at the edge, cloud, or core, **open-source solutions** are the key to achieving successful digital transformation for enterprise.

OPEN SOURCE
is the heart of the data center
and the basis of today's data-centric workloads

PUBLICLY AVAILABLE

DECENTRALIZED

COLLABORATIVE

SUSE
is the leader in open source

SUSE's market-leading Linux®, Kubernetes, container and cloud offerings enable customers to innovate and evolve from anywhere

HPE
provides seamless integration

SUSE technologies are certified on HPE servers, HPE GreenLake, and more—all supported by HPE Pointnext Services

SUSE on HPE enables better performance and faster time to value while protecting critical business operations. Here's how:

Workload acceleration
for High-performance computing, powered by Linux-based SUSE and HPE solutions

Multi-cloud workloads
enabled through enterprise Linux development and all needed components

Linux management
for zero downtime on mission-critical IT software such as SAP®

Container management
for any Kubernetes and cloud-native application, using SUSE Rancher

Together, HPE and SUSE are a winning team:

25+
years of shared innovation

90%
of the Fortune Global 50 use HPE

80%
of the Fortune Global 50 use SUSE

100%
of HPE ProLiant servers run SUSE

HPE and SUSE can help you accelerate your digital transformation by implementing a holistic strategy designed to get the most from your apps, data and workloads everywhere—and at every scale.
